- Asnyc PostgreSQL handler

Getting started

```
$ kore create example
created example/src/example.c
created example/conf/example.conf
created example/.gitignore
example created succesfully!
```

Getting started

```
$ cd example
$ ls
assets  cert    conf    src
```

Getting started

```
$ cat src/example.c
#include <kore/kore.h>
#include <kore/http.h>

int page(struct http_request *req)
{
  http_response(req, 200, NULL, 0);
  return KORE_RESULT_OK;
}
```

Getting started

```
$ kore run
compiling example.c
example built succesfully!
[parent]: running on https://
127.0.0.1:8888
[parent]: kore is starting up
[wrk 0]: worker 0 started (cpu#0)
```
